Team ID	SWUID20250209075
Project Title	Global Malnutrition Trends: A Power BI Analysis (1983-2019)
Maximum Marks	3 Marks

Data Quality Report Template

The Data Quality Report Template will summarize data quality issues from the selected source, including severity levels and resolution plans. It will aid in systematically identifying and rectifying data discrepancies.

Data Source	Data Quality Issue	Severity	Resolution Plan
malnutrition-estimates.csv	Missing values for some countries/years in stunting, wasting, or underweight indicators.	Moderate	Replaced missing values with NULL and excluded them from visualizations; applied filters to only show complete records.
malnutrition-estimates.csv	Inconsistent country naming conventions (e.g., "United States" vs "USA").	Low	Standardized country names during data preprocessing in Power Query.
country-wise-average.csv	Different scales/units for some indicators (percentages vs counts).	Moderate	Converted all values into a consistent format (percentage

			or numeric counts) for comparison.
Both datasets	Large dataset size (~11 million survey samples) may impact Power BI performance.	High	Applied data reduction techniques : filtering unnecessary columns, using measures instead of calculated columns, and aggregating at country-year level.
Both datasets	Presence of outliers (e.g., unusually high overweight values in some high-income countries).	Low	Verified data validity and retained outliers since they represent real conditions, but highlighted them in visuals for context.
